## CERTIFICATIONS

Certified Fire and Explosion Investigator  
Certified Vehicle Fire Investigator  
NFPA 1033 Pro Board Certified

## TECHNICAL AFFILIATIONS

Member – National Association of Fire Investigations (N.A.F.I.)  
Member – Fire Investigation Association of Alberta (F.I.A.A.)  
Member – International Association of Fire Fighters (I.A.F.F.)

## PROFESSIONAL EXPERIENCE

Currently I have performed over 150 investigations to date.

### February 2017- Current

Fire and Explosion Investigator, **Origin and Cause Inc.**  
Edmonton, Alberta  
Conduct Fire and Explosion origin and cause investigations.

### 2004 - 2021

Investigations, **Edmonton Fire Rescue Services**  
Edmonton, Alberta  
Former Captain Qualified Fire Investigator with the City of Edmonton Fire Rescue Services Investigations Branch. Joined the Edmonton Fire Rescue Services in 2004 working as a fire fighter on the suppression side. In May of 2016 joined the Edmonton Fire Investigations branch.

### Duties and Responsibilities

My primary duty as a Fire investigator with The City of Edmonton while working within the Alberta Safety Codes Act is to determine the Origin, Cause, and Circumstance of each fire/explosion I investigate, write up detailed reports and forward them off to the Provincial Fire Commissioners office.

### April 2000-2004

Loop Assignment and Activations Technician, **TELUS Communications**

- Processing both urban and rural service orders including field, software and over line orders for Res, Bus, Centrex, Micro link and LNP
- Assigning cable and line equipment, and line equipment features
- Line activation
- Worked with TELUS programs such as FMS, SDAS, CRIS, ASAP, and Infosource.
- Working knowledge of assignment, with trouble reporting/shooting, and order flow.
- Member of the ADSL Escalations Team
- ADSL provisioning and activation
- Familiar with PBX and Meridian 1 systems options 51c, 61c, &81c
- Deputy Fire Warden for floors 18,19,20.21
- Employee Health & Safety Committee member
- First Aid attendant for 20th floor

### April 1991 – January 1999

Eastern Canada Field Services Supervisor & Transportation Coordinator, **PTI SERVICES** Head Office (1997 - 1999)

- Coordinated industrial housing projects from Alberta to the East coast, with responsibility for job costing, estimating, fleet management and supervision of manpower and equipment, and dealing with client/customer concerns and requests in an expedient and professional manner.

On Site Supervisor (1993-1997)

- Supervised crews of 2-25 men and equipment in setting up pre-fabricated housing for oilfield, forestry, and mining companies around the world, in which time I spent two months in Russia setting up housing for a gold mine.
- Extensive hands-on electrical, plumbing, and carpentry experience.
- Performed job costing and budget control duties for each project.
- Operation and inventory control of service truck.

## TRAINING

July 2016 – Basic Fire Safety Codes Officer (B.F.S.C.O)

- An online distance Learning course provided by Lakeland College on the Alberta Safety Codes Act and Fire Discipline. Dealing with local fire problems as shown through stats, as well as basic inspection techniques and basic fire hazards.

January 2016 – Electrical Safety

- A 3 hour tested training program provided by the (I.A.A.I) International Association of Arson Investigators on the Certified Fire Investigator Trainer website (CFITrainer.net).
- This course provided critical electrical safety practices that a fire investigator should implement at fire scenes.
- Includes how electricity is supplied to a building, the electrical safety actions to complete during the preliminary scene assessment, ongoing electrical safety measures to be practiced throughout the investigation, what the investigator needs to know about static electricity, and what electrical safety equipment should be in the investigator's toolkit.

January 2016 – Residential Electrical Systems

- A 4 hour tested training program provided by the (I.A.A.I) International Association of Arson Investigators on the Certified Fire Investigator Trainer website (CFITrainer.net).
- This course taught the basics of the electrical power generation, distribution, and transmission system.
- This course taught the basics of the electrical power generation, distribution, and transmission system. Then explains how power flows into and throughout a residence. Specific topics include AC and magnetism, the generation and transmission of electrical energy, key elements of the electrical distribution system, residential service components, overcurrent protection, and branch circuits.

December 2016 – Basic Electricity

- A 4 hour tested training program provided by the (I.A.A.I) International Association of Arson Investigators on the Certified Fire Investigator Trainer website (CFITrainer.net).
- This course introduced the basic electrical concepts, including: terminology, atomic theory and electricity, Ohms Law, Jules Law, AC and DC power.
- This course showed the important relationship between resistance, current, and heat is fundamental to understanding how electricity can be a competent fire ignition source. Electricity can cause fires in many ways. A knowledge of basic electricity is essential to successfully investigate potential electrical ignition sources at a fire scene, test hypotheses involving electrical ignition sources, form a conclusion supported by evidence, and competently present methodology and conclusions in legal proceedings. This module provides the foundation of that basic electrical knowledge.

### December 2016 – Digital Photography and the Fire Investigator

- A 4 hour tested training program provided by the (I.A.A.I) International Association of Arson Investigators on the Certified Fire Investigator Trainer website (CFITrainer.net).
- This course discusses the basics of digital photography for a fire investigator as well as software and editing procedures for digital images to be used as evidence.

### December 2016 – Transportation of Dangerous Goods

- A one-hour online tested training program offered by Edmonton Fire Rescue Services Training School.
- This course covered the safe handling and transportation of dangerous goods mandated by federal law under Transport Canada.

### July 2016 – Introduction into Youth Set Fires

- A 3 hour tested training program provided by the (I.A.A.I) International Association of Arson Investigators on the Certified Fire Investigator Trainer website (CFITrainer.net).
- This course provided the foundational background on the scope of the youth set fire problem, the importance of rigorous fire investigation in addressing this problem, and the roll of key agencies in the response to a youth set fire. This course also presented the responsibility of the fire investigator when working with a youth set fire.

### July 2016 – Accreditation, Certification, and Certificates

- A 3 hour tested training program provided by the (I.A.A.I) International Association of Arson Investigators on the Certified Fire Investigator Trainer website (CFITrainer.net).
- This course provided a primer on accreditation, certification, and certificates for fire investigation training.

### February 2016 – Workplace I/C End user Fall Protection Program

- This half-day end user program taught me to understand the essentials of fall protection as it relates to simple systems and work at heights.

### May 2016 – Incident Command System 100

- This course was an online web based course put on by Edmonton Fire Rescue Services Training School.
- The Incident Command System (ICS) is an up-to-date internationally recognized emergency response organizational structure developed to effectively manage all types of incidents such as spills, fires and explosions, and serious vehicle or production accidents.

### July 2014 – Firefighter Qualified Station Officer Program

- An eight-week course was provided by the Edmonton Fire Rescue Services Training school and is a required course to be promoted to the rank of Captain within the Edmonton Fire Rescue Services.
- Course details include fire ground operations, conflict resolution, Incident Command, problem solving, fire ground organization, and introduction into Fire Investigations and Inspections.

### 2005 – Fire Fighter Courses taken Via Lakeland College

- FF ET100A NFPA 1001 Level I Theory
- FF ET110A NFPA 1001 Level I Practical
